

TopoSys Summer Special 2004

TopoSys®

Dear Sir or Madam,

We are pleased to inform you about the TopoSys Summer Special 2004. Our Summer Special is a temporary sales activity including price reductions with up to 25% discount on all TopoSys data products. From June until September 2004 data acquisition and processing is available to noticeable reduced prices, depending on size and character of the project. Our Summer Special is valid for all projects which are ordered and completely surveyed within the period June to September 2004.

As you might have heard, TopoSys now operates three Falcon systems in order to meet the growing demand for laserscanning projects in the leafless season in time and in high quality. Our increasing capacities in data acquisition allow for a flexible pricing system – to your advantage. We profit by a consistent utilisation of our system and you benefit from seasonal reduced prices.

As an additional bonus, our Summer Special includes a free flight over your project area during data acquisition. You enjoy discovering your area from above and also have the possibility to see our Falcon system in practice working for you. Further information can be obtained from your TopoSys contact person. The free flight special is also confined to the period June to September 2004.

Fly with us into the summer!

Your TopoSys Sales Team
