

TopoSys Summer Special 2005

TopoSys®

Dear Sir or Madam,

We are pleased to inform you that we start again with an attractive offer into this years summer season. The TopoSys Summer Special 2005 is a temporary sales activity including price reductions with up to 25% discount on all TopoSys data products. From June until September 2005 data acquisition and processing is available to noticeable reduced prices, depending on size and character of the project. Our Summer Special is valid for all projects which are ordered and completely surveyed within the period June to September 2005.

The possibility to operate our three Falcon systems in parallel guarantees a performance of our laserscanning projects on schedule and in high quality - also in the leafless seasons of high demand. Our enormous capacities in data acquisition allow for a flexible pricing system in the summer period - to your advantage. We profit by a consistent utilisation of our system and you benefit from seasonal reduced prices.

As an additional bonus, our Summer Special includes a free flight over your project area during data acquisition. You enjoy discovering your area from above and also have the possibility to see our Falcon system in practice working for you. Further information can be obtained from your TopoSys contact person.

Fly with us into the summer!

Your TopoSys Sales Team
